(54) Titre : LE GLACON HOLISTIQUE

(54) Title: THE HOLIS ICICLE

(57) Abrégé/Abstract:

This is a clear or frosted decoration which is suspended underneath the soffit of a house and may be illuminated by attaching outdoor string lights inside the unit. The unit is molded from plastic and is hollow, at the top is a clip for securing the unit to the soffit of a roof.

### Abstract for the HoLiS Icicle

This is a clear or frosted decoration which is suspended underneath the soffit of a house and may be illuminated by attaching outdoor string lights inside the unit. The unit is molded from plastic and is hollow, at the top is a clip for securing the unit to the soffit of a roof.

## THE HoLiS ICICLE

### The Home Lighting System

The 'HoLiS Icicle' is a decorative device for the exterior of houses. It is easily installed and removed, for the wintertime, and simulates icicles hanging from the eaves trough. The units are either clear or frosted plastic and can be illuminated by the attachment of outdoor lights. Since they attach to the soffits of a roof, and the lights attach to them; the icicles overcome separate attachment of lighting to the roof.

They are made of molded plastic, with a drain hole, and can be formed in many different shapes and sizes. Fig. 1 shows the unit from the side and the top.

Fig. 2 shows a view from the back with one light from a string attached. Fig. 3 shows a side view with light attached; and Fig. 4 shows the same view without the light.

Fig. 5 is a top view with the clip in place, showing the position of the light holder directly over the centre of the icicle. Fig. 6 is the same view from the top but the clip is see through and in outline only.

Figs. 7,8 and 9 show a few of the variations in shape of the bottom of the icicle with the clip removed..

Figs 10 and 11 show a formed icicle grouping.

Since these icicles (singles and groupings) may be formed in any size or shape, the only uniform part would be the attachment to the soffit.

### **Claims for the Icicle**

This is a clear or frosted decoration which is suspended underneath the soffit of a house and is illuminated by attaching outdoor string lights inside the icicle.
